Madison Grace Goodnight is a precious 2 year-old little girl that lives with an unknown condition that causes her to have between 10-30 visible seizures a day, some lasting several minutes. She has also had several cases of pneumonia that further complicate matters. Because of her illness, Madison is unable to talk, walk, sit, or play, and relies on a feeding tube for nourishment.

Despite her parents unending efforts to support their family, the frequent doctor visits, numerous hospitalizations, and two required surgeries for Madison have placed a heavy financial burden on her family, to the point that they are attempting to sell their house to cut down on costs.

So please join us for this very noble cause! All donations collected will go towards helping lift some of the burden of this family of five's shoulders.

"We continue to love her more every day and are awed as we watch the different ways she touches the people who come into her life. She is our very special angel! She may not be able to talk, walk, sit, or play, but her smile will melt your heart and makes everything we do worthwhile!!!"

-Madison's parents
